

PROFESSIONAL SUMMARY

Enthusiastic Web Developer with 2.6 years of experience in JavaScript and front-end development, having successfully contributed to multiple projects in start-up environments. Proven ability to collaborate effectively and deliver high-quality solutions. Eager to advance my career as a Full Stack Developer in a dynamic, innovative setting.

WORK EXPERIENCE

VG Technologies

Frontend Developer | Web Developer

August 2022–April 2024

- Developed and delivered cross-browser and cross-platform compatible web applications in collaboration with the development team.
- Updated various components of existing projects to meet client requirements and improve user experience.

Softcon Business Solution

Front-End Developer

October 2021–April 2022

- Collaborated with a team of front-end developers to deliver and maintain web applications, consistently meeting client requirements and improving user satisfaction by 20%.
- Developed key components of an e-commerce project using React, resulting in a 12% increase in site performance and a 30% boost in user engagement.

CORE COMPETENCIES

- Proficient in front-end technologies including ReactJS, HTML, CSS, and JavaScript, with experience in Git for version control.
- Developed web applications using frameworks such as Express and Bootstrap, and worked with CSS libraries like Tailwind CSS.
- Experienced with back-end technologies including Node.js, MongoDB.
- Implemented multiple client projects using JavaScript, including ES6+ syntax and modern front-end frameworks like React (with Redux).
- Familiar with build tools, package managers, and version control systems (e.g., Webpack, Babel, NPM, Git, Vite).
- Strong knowledge of Java and expertise in Data Structures and Algorithms (DSA) with OOP concepts.
- Capable of writing testable code and ensuring application compatibility across different browsers and platforms.
- Extensive experience using code editors like Visual Studio Code and its extensions.
